

FileMax

- ◆ **FileMax is a dedicated server application which simplifies the management of multi-purpose, multi-user file sharing by adding;**
- ◇ **Logging** - identifies the origin (sender) and destination (receiver) of each file deposited
- ◇ **Routing** - provides a simple and convenient interface for the transfer of files, eliminating the need for FTP client software
- ◇ **Notification** - automatically sends an email to the recipient of the file, notifying them that a file is waiting to be downloaded

FEATURES AND BENEFITS

- ◆ Send and retrieve files using only a web browser – no FTP client required.
- ◆ Ideal for large files, which can be impractical to send via email.
- ◆ Be notified by email when a file arrives for you, or you team.
- ◆ Send multiple files simultaneously
- ◆ Manage all incoming files for the entire enterprise in a single location
- ◆ Restrict access to specific file types

TECHNICAL

- ◆ Cloud Solution hosted by Next Dimension
- ◆ On premise VMWare hosted template
- ◆ Supports Internet Explorer 9.0+
- ◆ Supports Google Chrome 25.0+
